SUMMARY

Frontend Engineer with expertise in Angular and React, building scalable, high-performance enterprise applications and modern component-driven UIs. Hands-on experience building production grade React applications using Hooks, modern state management, and Vite.

SKILLS

- **Tech**: **Angular 17**, TypeScript, RxJS, NgRx, Karma, **React**, JavaScript, Redux, Jest, GraphQL.
- **Tools**: Vite, **Tailwind**, **Node.js**, Git, AWS (S3, Lambda, EC2), VS Code, Agile/Scrum, Python.
- **Architecture**: Accessibility (WCAG/ARIA), Component Architecture, Performance optimization, Micro-frontend concepts, Atomic Design.

EXPERIENCE

Cognizant **May 2023 - Jan 2026**

Frontend Engineer

- Developed customer facing **Angular 17** dashboards to improve workflow engagement by **25%**.
- Developed app using Angular **signals**, standalone components to **cut bundle size by 10%**.
- Conducted **100+ code reviews** and **mentored junior engineers**, resulting in measurable improvements in code quality and reduced defect rates.
- **Tech**: Angular 17, TypeScript, RxJS, NgRx, Karma

TD Bank – Business Banking **Jan 2021 - Apr 2023**

Frontend Engineer

- Developed enterprise application **improving load times by 40%** through code-splitting and memoization.
- Designed a reusable, component system with TypeScript, **reducing UI build time by 30%.**
- Implemented scalable state management with Redux/Context and boosted test reliability using Jest + React Testing Library.
- **Tech**: React, JavaScript, TypeScript, Redux, Jest

PORTFOLIO WORK

Mock Banking App – https://adirathore7.github.io/

- Built a high performance dashboard, achieving **sub second load times** through bundle optimization.
- Developed **form driven** account and transaction flows, reducing UI errors and improving reliability.
- Designed WCAG compliant components for rapid feature iteration and to **reduce dev effort by 30%**.

Portfolio Website – https://aadishrath.github.io/

- Developed scalable **React application** using functional components and hooks.
- **Optimized performance** and load times, code splitting, and efficient bundling strategies.
- Implemented a fully **responsive UI** with state management suitable for enterprise scale architecture.

EDUCATION

Illinois Institute of Technology, (Remote, Part-time) **Sep 2023 - Dec 2025**

Master of Applied Science (Data Science), GPA: 3.7

McMaster University, Hamilton, Canada **Dec 2020**

Bachelor of Technology – Major in Software Engineering
