Aadish Rathore

Frontend Engineer | TypeScript, Angular, React & Next.js
415-233-2272 | adib.rathore@gmail.com | Portfolio | LinkedIn | GitHub

SUMMARY

Frontend Engineer with 6 years of experience delivering customer-facing web applications, analytics dashboards, and shared UI systems. Focused on rendering performance, accessible interactions, API integration, and reliable releases. Production Angular experience complemented by deployed React and Next.js projects.

TECHNICAL SKILLS

Core: TypeScript, JavaScript, HTML, CSS, responsive design, accessibility, browser debugging.
Frontend: React, Next.js, Angular, RxJS, NgRx, reusable components, state management.
Quality & delivery: Jest, Vite, Playwright, Git, Github, npm, Figma, Vercel, Render.
Integration: REST, GraphQL, Node.js, Supabase, PostgreSQL, Zod, Tailwind CSS.

PROFESSIONAL EXPERIENCE

Frontend Engineer | Abbott May 2026 - Present

- Modernized frontend components with Signals and Standalone Components, reducing bundle size by 30%.
- Optimized rendering and caching, improved API error handling, and resolved P1/P2 issues in customer-facing application workflows.
- Expanded Jest unit-test coverage from 80% to 90%; partnered with UX and requirements teams on UI architecture and shared component patterns.

Frontend Engineer | Cognizant May 2023 - Apr 2026

- Led frontend architecture and delivery for customer-facing analytics dashboards; implemented state management, server-side pagination, and virtualized filtering.
- Migrated 12 core frontend modules to Standalone Components, reducing the production bundle size by 10%.
- Established accessibility checklists and reusable component patterns across 100+ code reviews; reduced QA remediation from 5 days to under 3 days per sprint.

Frontend Engineer | TD Bank Sep 2020 - Apr 2023

- Improved customer facing application load time from 4.2 sec to 2.5 sec through performance optimization.
- Architected micro frontend modules with Module Federation for independent deployment across 4 teams; delivered an Atomic Design component library adopted by those teams.
- Established component testing contracts across 200+ Jest tests, increasing coverage from 67% to 84%; strengthened input validation and API rate limiting.

SELECTED PROJECTS

AdiBank Copilot | **Next.js, React**, TypeScript, **Supabase** | Live Demo | Repository

- Built and deployed a responsive banking demo with account management, transfers, analytics, and distinct customer/admin interfaces; added loading, error, and confirmation states.
- Implemented authenticated APIs, row-level security, atomic transfers, and a command-based assistant with signed confirmations; tested UI behavior and SQL workflows with Jest.

Frontend Engineering Portfolio | **React** 19, Vite, CSS, Playwright | Live Demo | Repository

- Built reusable cards, responsive navigation, and theme-aware dialogs with keyboard focus management, semantic controls, Escape dismissal, and reduced-motion support.
- Reduced the largest minified JavaScript chunk from 1.54 MB to approximately 269 KB through lazy-loaded routes; added Playwright checks and GitHub Actions CI.

EDUCATION

Master of Data Science | Illinois Institute of Technology | Sep 2023 - Dec 2025
Bachelor of Technology | McMaster University | Dec 2020
